

Instruction

Model: LED Sensor Light
Input Voltage: USB 5V

Brief Introduction:

This LED Light is the newest version on the market, it is a combination of two sensor modes, ONLY Motion Sensor and Motion&Light Sensor, which adopts the wireless motion sensor (PIR) technology, automatically turn on when motion is detected within sensing range in dark place and automatically turn off after 20 seconds of no motion, or also just detect motion, then it will automatically light on. Perfect for your bedroom, stairs, hallway, kitchen, closet, cabinet, wardrobes or other dark places.

Function:

- 1. Always On Mode:** Light for the long light state, the equivalent of flashlight lighting
- 2. Motion & Light Sensor Mode:** Under dark enough condition, Automatically powers on when motion is detected within 3 meters, automatically powers off after 20 seconds of inactivity.
- 3. Only Motion Sensor Mode:** Automatically powers on when motion is detected within 3 meters, automatically powers off after 20 seconds of inactivity. Not only powers on in dark, but also in daytime.
- 4. Easy to install:** No tools or screws to install, stick directly by 3M adhesive and magnetic strip.
- 5. Power supply:** Built-in lithium battery, can be charged directly by USB cable.
- 6. Long serving life:** Ultra-high conversion efficiency make this light's battery life is longer than normal light, offer 80,000h serving life, needn't to change led light.

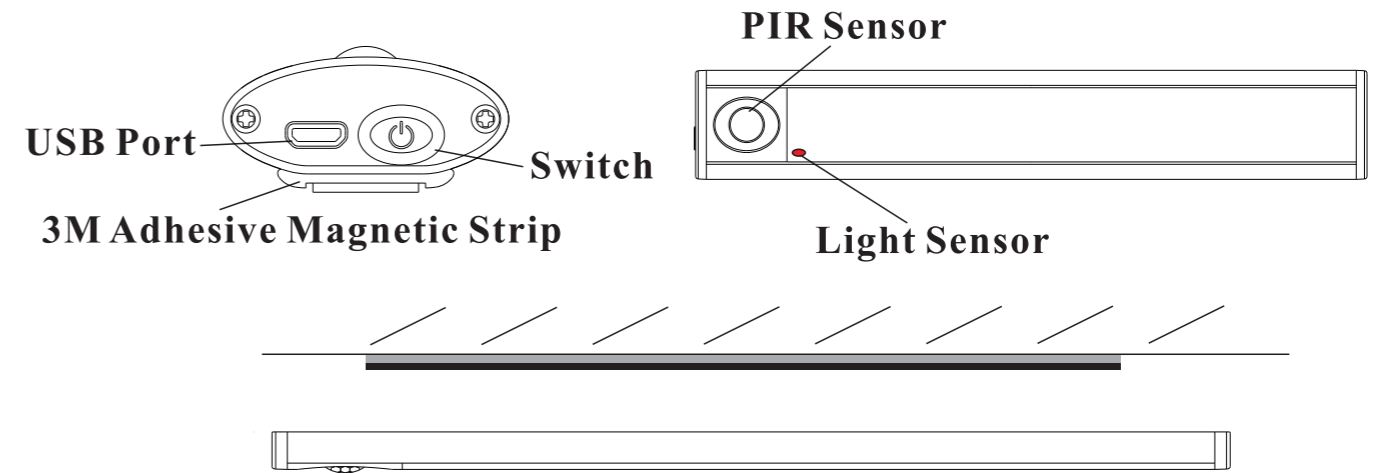

Switch Description:

A: Long Press Introduction

1. Mode 1 (Always On): Long press switch about 2 seconds to turn on the light and it is the Always On Mode.
